## **BF 120 WALL FORMWORK**

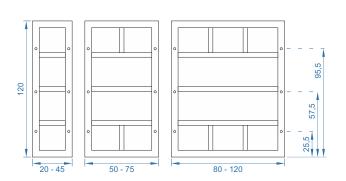

Designed for shuttering straight sections of walls. They consist of a frame and plywood. The frame is made of closed high-quality steel profiles and its anti-corrosion protection is made by powder coating.

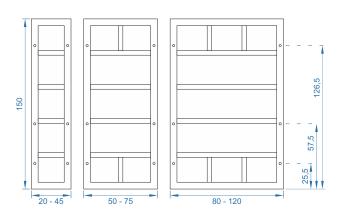

The sheathing is made of multi-layer waterproof plywood coated on both sides with a resin coating.

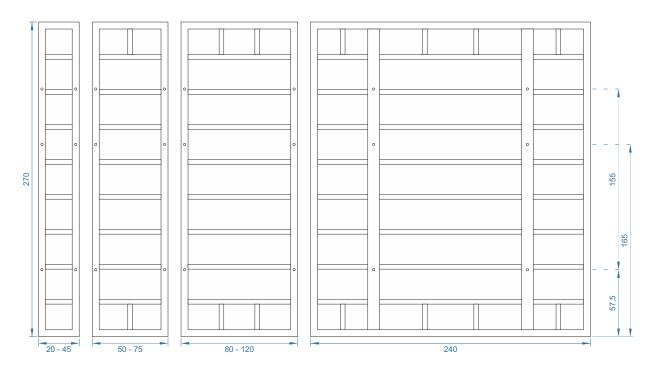

It guarantees high quality of concrete surface and a long life of formwork surfaces. The permissible concrete pressure is  $80\,\text{kN/m}$ .

The dimensions and weight of BF 120 wall formwork is:

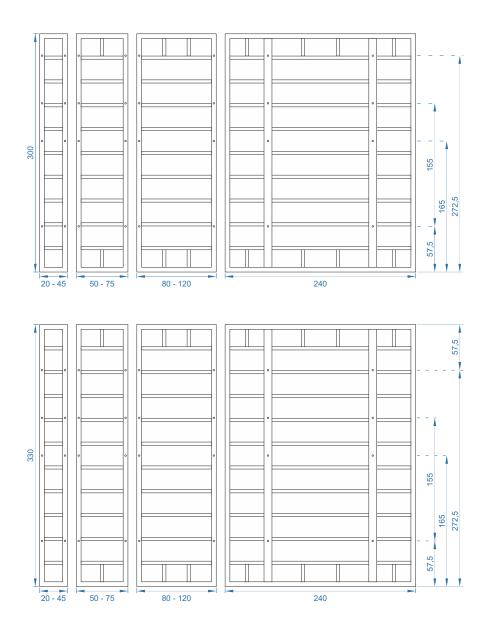

height [cm]	120	150	270	300	330
width [cm]			weight [kg]		
240			327,60	365,10	398,70
120	71,50	85,70	171,20	190,70	212,30
110	65,10	78,30	152,60	172,60	201,30
100	60,70	73,20	138,40	158,30	175,60
90	56,40	68,00	114,30	126,00	140,20
80	49,80	60,50	103,00	113,60	126,70
75	47,60	57,80	98,80	109,00	121,40
70	45,50	55,30	94,50	104,30	116,20
65	43,3	52,80	90,30	99,70	111,00
60	41,20	50,20	86,10	95,00	105,60
55	39,00	49,30	81,90	90,40	100,50
50	36,80	45,00	77,60	85,70	95,20
45	34,60	42,20	73,40	81,20	89,30
40	32,40	39,60	69,00	76,00	84,20
35	28,00	34,50	64,70	71,40	79,80
30	27,30	34,50	60,40	66,70	73,30
25	26,50	32,20	56,30	62,10	68,50
20	25,50	30,60	52,30	57,50	65,40

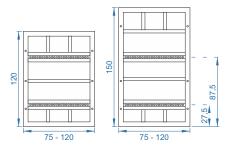

## **BFS 120 UNIVERSAL PANELS**

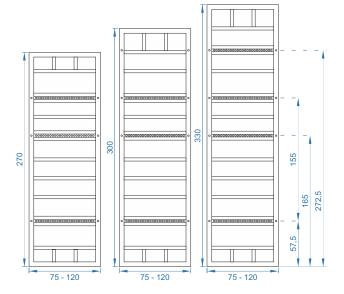

The construction of a universal panel differs from the design of a linear panel due to several rows of holes for tie rods made at a distance of 50 mm.

The universal panel is used to form square and rectangular posts and to create panel joints in the shape of "T" i "\Pi".

### Dimensions and weight of BFS 120 universal panels:

height [cm]	120	150	270	300	330	
width [cm]	weight [kg]					
120	73,00	90,70	182,30	199,80	211,30	
90	55,00	63,00	121,10	134,50	148,30	
75	45,00	63,00	94,50	117,20	129,40	

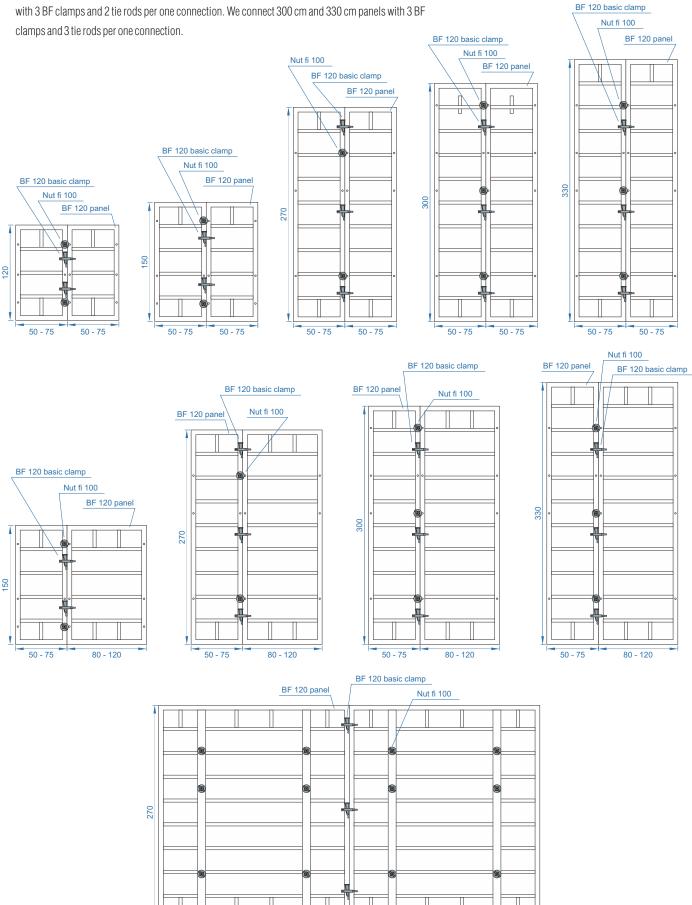

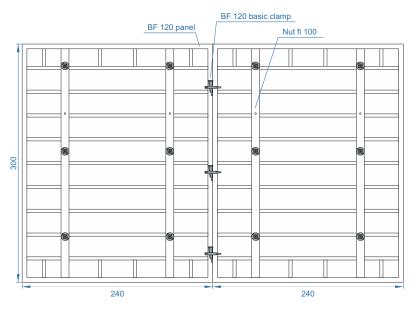

## **WALLS WITHOUT LEVEL RAISERS**

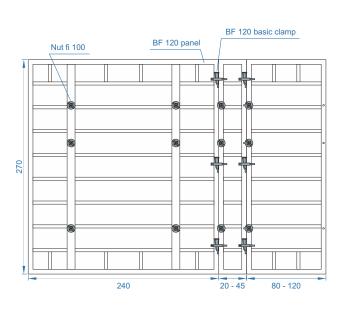

We have walls with a height of 120 cm, 150 cm, 270 cm, 300 cm, 330 cm. We connect 120 cm and 150 cm panels with 2 BF 120 clamps and 2 tie rods per one connection. We connect the 270 cm panels with 3 BF clamps and 2 tie rods per one connection. We connect 300 cm and 330 cm panels with 3 BF

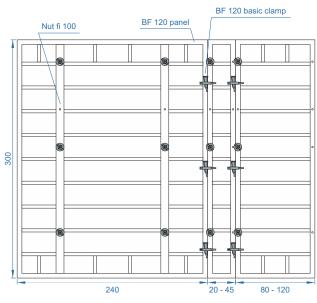

240

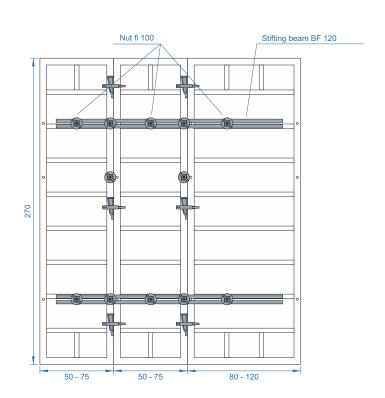

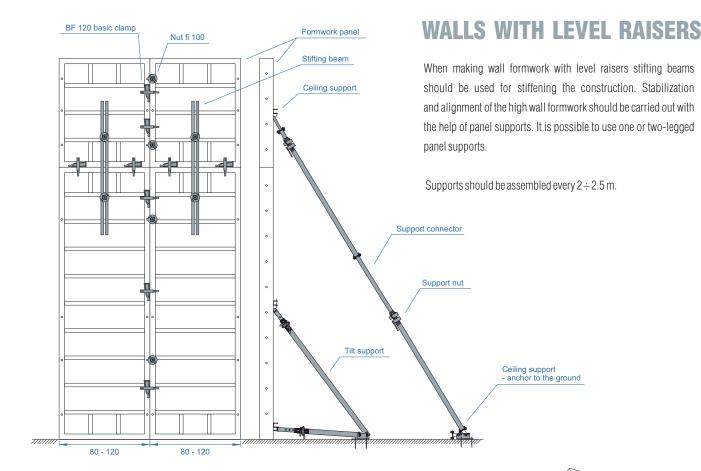

## **STIFTING BEAM**

When joining panels of small widths stifting beams should be used to obtain straight formwork and to stiffen the formwork structure. The beams are connected to the panels by means of a tightener and nuts fi 100. Tightener with a nut fi 100, BF 120 stifting beam.

## **CORNERS**

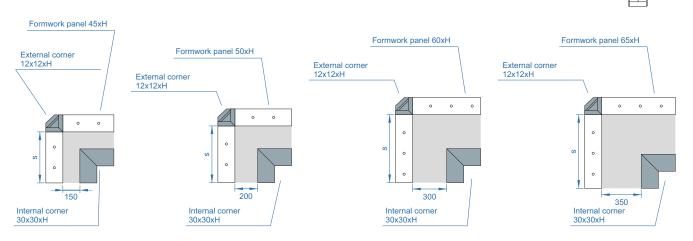

The corners are designed to create the inner side of a right corner of the building's wall. They consist of a frame and sheathing. The internal corner frame is 12 cm thick, and the plywood sheathing is 18 mm thick.

### **Dimensions and weight of internal corners:**

height [cm]	120	150	270	300	330
width [cm]			weight [kg]		
30	40,00	49,00	84,70	93,60	102,50

### **Dimensions and weight of external corners:**

	_								
height [cm]	120	150	270	300	330				
width [cm]	weight [kg]								
12	19,80	24,78	44,08	48,74	53,72				

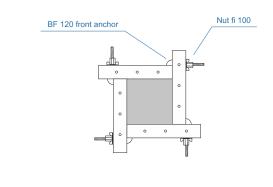

Hinged internal corners are designed to create intermediate angles of the building walls (internal and external formwork). They consist of two frames connected by a hinge and sheathing. The corners are distributed from 60 to 270.

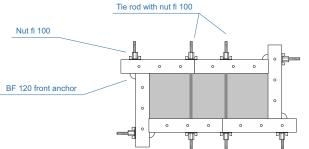

### **Dimensions and weight of articulated corners:**

	Dimensions and	weight of	f articulate	ed corner	S:		
	height [cm]	120	150	270	300	330	
	width [cm]			weight [kg]

## THE CONSTRUCTION OF COLUMNS

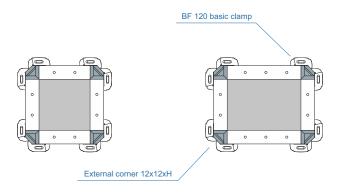

In order to best construct post formwork the solution is to use a BFS 120 multi-hole formwork, which allows the construction of columns in a 5 cm pivot module. The 75 cm panels allow the construction of posts from  $15 \times 15$  cm to  $60 \times 60$  cm.

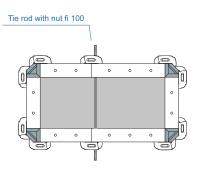

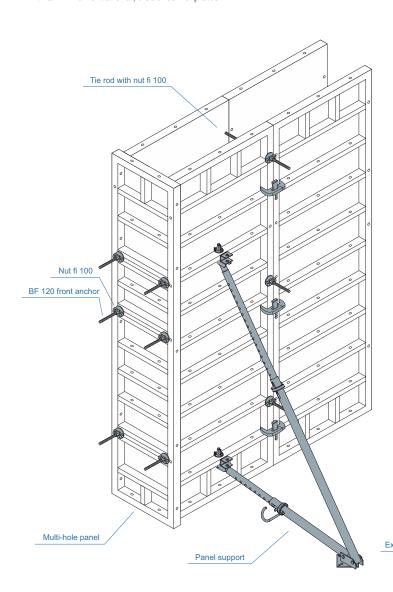

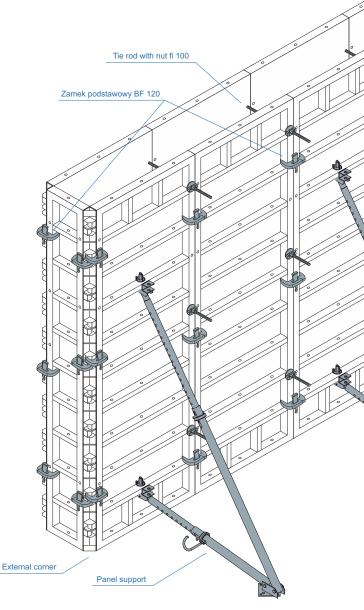

The columns can also be formed from basic formwork using external corners. The above drawings show the examples of this solution.

## THE ENDS OF WALLS

For a proper shuttering of the end of a wall use basic panels and external corners. Alternatively, a multi-hole panel can be used with a BF 120 front anchor, disc or combi plates.

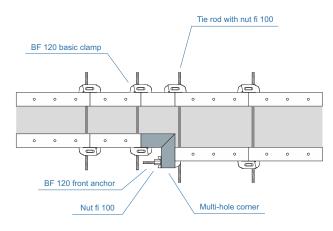

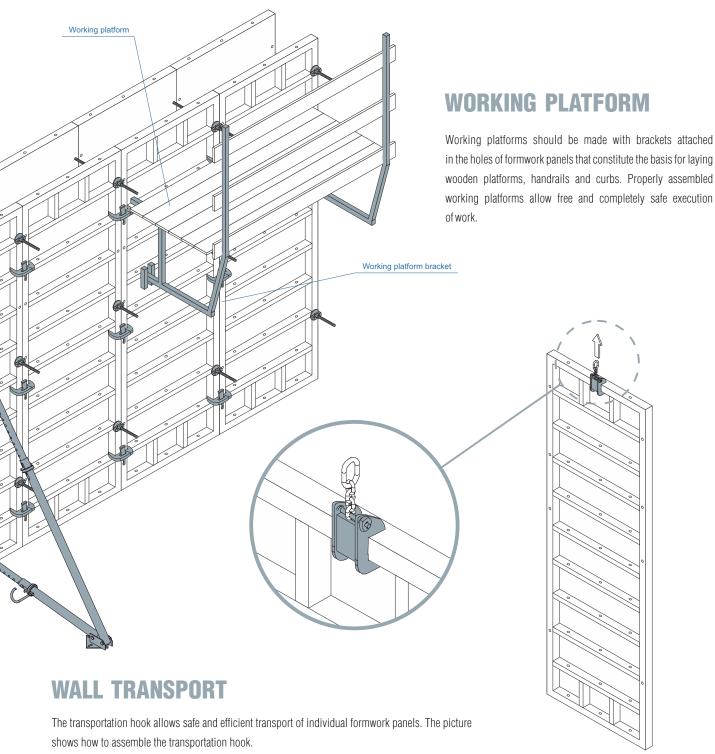

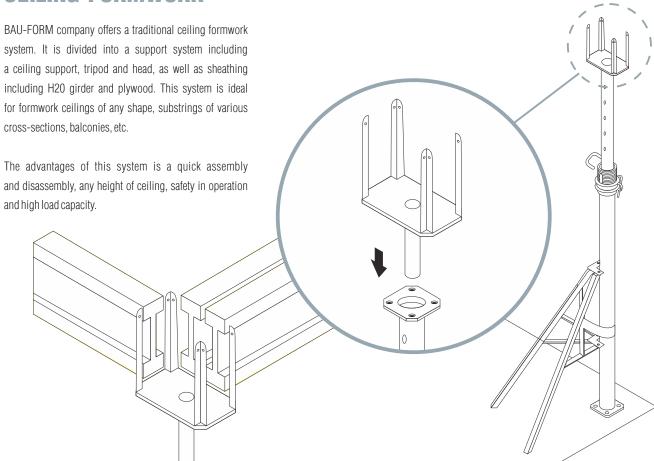

# FORMING WITH VARIABLE THICKNESS OF THE WALL

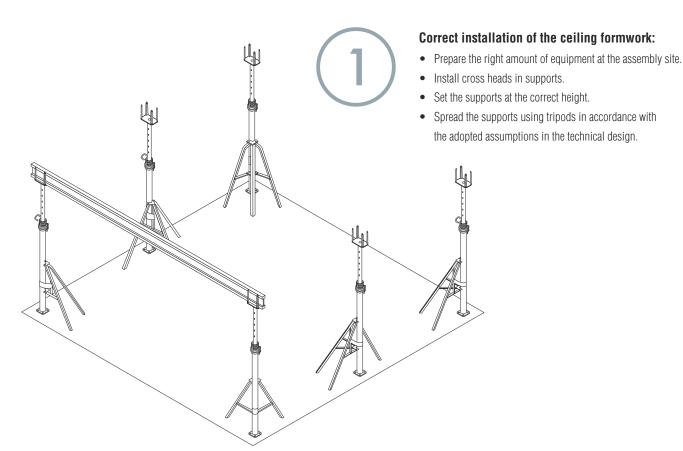

Forming formwork with changing the wall thickness can be done with the help of a internal corner, front anchors with disc or combi plates.

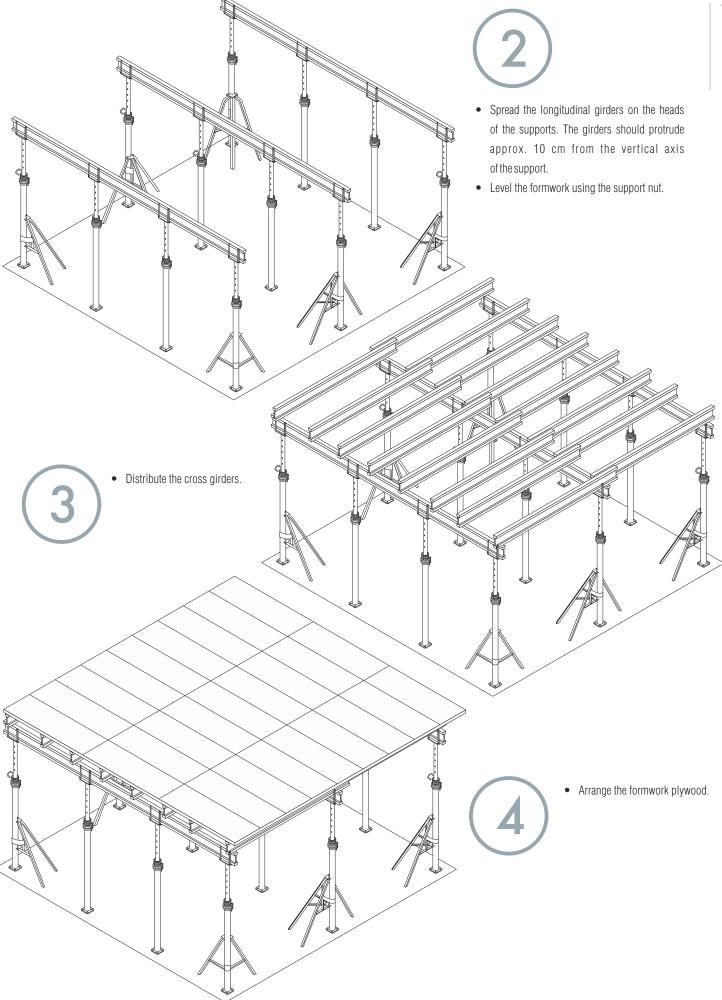

### **CEILING FORMWORK**

### BAU-FORM Sp. zo.o. Sp. K.

### PROJECT DEPARTMENT:

### **ADMINISTRATION DEPARTMENT:**
